DETD Inununocytochemistry and inmunofluorescencei
SW480 cells, transfected with expression plasmids, were stained 24 h later with an anti-human-**WAF1** monoclonal **antibody** (Abl; Calbiochem) as described (El-Deiry et al., 1995, supra). Immunofluorescence analysis of BRCA1 expression was performed as described (Thakur et al., 1997, supra).

ABEN A human gene, WAF1, has been identified which is induced by wild-type but not mutant p53 in human brain tumor cells. The gene is located on chromosome 6p21.2 and directs the synthesis of an 18.1 kd protein. Introduction of WAF1 cDNA suppresses growth of human brain and colon tumor cells. The WAF1 gene and protein are useful inter alia for diagnosis and treatment of human tumors.

ABFR On a identifie un gene humain, le WAF1, induit dans les cellules tumorales du cerveau humain par des p53 de type sauvage, mais non mutant. Ce gene, situe sur le chromosome 6p21.2 regle la synthese de la proteine 18.2 kd tandis que son ADNc arrete la croissance des cellules tumorales du cerveau et du colon chez l'homme. Le gene et la proteine du WAF1 s'averent notamment utiles pour le diagnostic et le traitement des tumeurs chez l'homme.

ABEN Methods and apparatus for subsurface imaging of a sample. An optical coherence topography system utilizes a scanning (30) probe (24) to scan radiation (40) relative to a sample to generate subsurface images (32).

ABFR L'invention concerne des procedes et un dispositif d'imagerie sous-surfacique d'un echantillon. Dans un systeme de topographie a coherence optique, on utilise une sonde (24) de balayage (30) pour balayer un rayonnement (40) par rapport a un echantillon, afin de produire des images sous-surfaciques (32).
